

Update Bulletin: Building Structure & Envelope Sciences

Cambium's construction engineering support services assist clients to make better decisions through the full construction program.

Cambium is proud to introduce our Building Structure & Envelope Sciences team serving advanced construction projects throughout Ontario. These services augment the inspection and testing components of Cambium's existing Construction Monitoring services. Our team commitment and experience enhances client confidence in each development project, which is best summarized by our mission of Guiding Good Decisions.

Our goal is to contribute value to every project and assist our clients to achieve successful outcomes. Cambium now offers further construction engineering support services in the critical pre-design stage, design tendering, and contract administration. Our team understands the complexity of construction materials and techniques. This understanding often translates to solutions for design constraints and recommendations for better materials management.

Cambium's newly enhanced services include:

- CSA S16 Structural Steel & CWB Certified Welding Inspections
- Building envelope inspections including window and curtain walls, rain screen and cladding
- Roofing Systems Design, Tendering, and Contract Administration
- Roofing System Inspections and Reviews
- Existing Asset Condition Reviews
- Failure Analysis Investigations
- Reinforcing Steel Verification
- Machinery inspections and assembly reviews
- Concrete (Grout/Mortar) Testing and Monitoring

We will advocate for our clients that quality be built into the project from the start to avoid costly changes, correction, or delays. The investment in Cambium services is always a positive return for the project.

Bob Payne, CWB III
Sr. Construction Specialist
Bob.Payne@cambium-inc.com
705.742.7900 x 205

- Specializes in building structure and envelope sciences
- Expertise in Contract Administration and Construction Engineering

Charles Carr, CWB I
Sr. Specialist
Charles.Carr@cambium-inc.com
705.742.7900 x 241

- Specializes in large scale steel structures and QA/QC inspections
- Red Seal Iron Worker

Barry Reid,
Building Science / Construction
Inspection Specialist
Barry.Reid@cambium-inc.com
705.719.0700 x 401

- Specializes in building envelope sciences
- Expertise in construction monitoring and QA/QC inspections

Will Morris, Hons. B.Sc., C.Tech.
Project Coordinator & Sr. Inspector
Will.Morris@cambium-inc.com
705.741.4109 x 339

- Specializes in building envelope sciences
- Expertise in construction monitoring and QA/QC inspections
